BEYOND ORDINARY. LEGENDARY.

OUR LEGACY

Since 1893, Wenger S.A. of Switzerland has been known as the Maker of the Genuine Swiss Army Knife™. Based in the town of Delémont in the heart of the Swiss Jura region, Wenger became established as one of Europe's leading knife makers and one of two official producers of the Swiss Army Knife.

Trusted as a supplier of the "Standard Issue" knife to the Swiss Army since 1908, the Genuine Swiss Army Knife™ continues the tradition of Wenger's innovation, craftsmanship, and quality design. The Genuine Swiss Army Knife™ set the standard by being built of the finest material and meticulously engineered, developed to be rugged and durable. There are numerous models available to meet various needs and lifestyles.

The Wenger Genuine Swiss Army Knife™ was the first true multi-tool and is a legend worldwide.

OUR AUTHENTICITY

To identify an authentic Wenger Genuine Swiss Army Knife™, please verify the following features:

The Wenger trademark and the "crossbow" logo etched at the base on the main blade.

The Wenger Swiss Army Knife logo (a white cross in a round-cornered square) on the handle.

SPRINGLESS LEVER DESIGN - The patented springless lever design prolongs the life of every pair of self-sharpening serrated scissors. By using a lever instead of an external spring, we've eliminated the need to replace the one part that always seems to wear out or get lost on other knives.

ADJUSTABLE PLIERS - The Wenger pliers use the same patented springless lever design as our scissors to provide the perfect tool for gripping and manipulating objects up to 5/8" (15mm). These pliers also crimp and cut wire to standard diameters.

PACKLOCK SCREWDRIVER - Our patented Packlock system prevents the flat head and Phillips® head screwdrivers from accidentally snapping shut. This safety lock system is engaged as long as pressure is applied directly on the tool, and then simply released for easy folding.

PATENTED & INNOVATIVE FEATURES

PACKLOCK - This self-locking mechanism on the main blade is a safety device that automatically locks the main blade in the open position, preventing possible injury. The release mechanism must be disengaged for the blade to close again.

JEWELLER'S SCREWDRIVER - A jeweller's screwdriver is a big help when you need it. It's great for repairing eyeglasses or other delicate accessories. And it can't get lost because it's always tucked in your pocket-sized Wenger Swiss Army Knife.

100% SERRATED BLADE - Wenger's exclusive 100% serrated blade gives you a faster, sharper cut through surfaces that an ordinary knife could never sink its teeth into. It maintains its sharpened edge longer, too.

INTRODUCING

EvolutionSERIES

EVOLUTION SERIES

- New ergonomically designed Swiss Army Knife
- Best grip for cutting, carving, screwing, uncorking and trimming
- Fits perfectly to your hand
- Designed for easier handling
- A more precise tool to use
- Same Swiss qualities; precision, ingenuity, reliability and practicality
- Lifetime warranty
